

**Step 1:** Draw the basic shape of your property (the lot your house is on):

**Step 2:** Draw all the permanent structures.....

**Step 3:**

After you have drawn all the "hard features" on your property, such as buildings, driveways, patios, walls, etc, take a measurement **from the main structure to the property line** in all four directions. Write the measurements on the site plan.

**Step 4:**

Take measurements from the main structure to any outbuildings, and from those outbuildings to the property line. Write these on the site plan.

**Step 5:**

Show the width of your driveway

**NOTE\*\*** This is a sample site plan of an imaginary property. Do not use it for your property. Use it only as a guide to draw your own site plan. Your drawing can be done simply with a pencil and ruler. It does not need to be computer generated.
