Other Community Parking Experiences

Fort Collins, Colorado

(Population: 166,069)

The City of Fort Collins Parking Services manages downtown parking spaces and makes them available to customers with many different needs. The mission of Parking Services is to support the economic vitality of downtown. We do that by helping to create on-street parking space turnover so that more people have an opportunity to park and enjoy downtown.

For those with longer term parking needs, permits are available in the two downtown parking garages and several surface lots.

Parking is a limited resource, and it takes both cooperation and enforcement to make sure everyone gets a chance to use the limited number of spaces.
