UNSCHEDULED WIDESPREAD POWER OUTAGE AT OGD

At approximately 7pm this evening, a Rocky Mountain Power (RMP) pole caught fire and created a wide spread power outage over most of the OGD Airport. RMP is replacing the pole and repairing the damaged connections. At 9:30pm RMP is estimating that the power should be restored around 3:00am, but it may take longer. Unfortunately, the Airport's new emergency generator is not yet fully functional. The final cutover for the Air Traffic Control Tower's power is scheduled for the 29th of March.

It is possible that if you arrive at the airport early tomorrow morning, that the access controlled gates will still be off-line. Please plan accordingly. I will be at the airport by 6:00am to check the status of the power restoration. Feel free to call me anytime after 6:00am to get an update from me.

Thanks for listening and supporting the Ogden Regional Airport.

bwg
