NOTICE OF POWER FAILURE AT OGD

If you are receiving this e-mail, it is because you are a access control badge holder at the Ogden Regional Airport (OGD). If you do NOT want to receive e-mails pertaining to the Ogden Regional Airport, please select the unsubscribe link at the bottom of this e-mail

This morning, Sunday July 19th at just before 10am, the main Rocky Mountain Power feed failed and caused a small fire. The fire has been put out and the Airport's emergency generator has been activated.

Unfortunately, all of the hangar areas, north and south of the terminal building, are without power. The crew working the power repairs believes that the power should be restored around 1:30pm. Kevin Dimick is staffing Vehicle Gate #3 next to Mountain Valley FBO until the power is restored. Vehicle Gate #2 is operating on the emergency generator.

Vehicle Gates #1 and #4 are without power and cannot be used.

Hopefully this information can help you plan your day and access into your hangars.

Thank you for your support!
