

**Ogden City Corporation
Request for Proposal
Ballistic Helmets**

Q & A

Updated: 2-7-24

- Is Full Cut a hard stop requirement - The FAST SF Helmet i'm offering is High Cut
The industry has moved away from the MICH/PASGT style helmets as they are not really the industry standard anymore. The FAST SF is the go to helmet for USSOCOM (Navy Seals, Delta Force, etc).

* We are requesting proposals on Full Cut. We do not want High Cut for our current applications.

-Ballistic Helmets are not required to be certified to an NIJ Standard such as 3A etc. These helmets are tested to the same standards by independent labs however they will not carry the NIJ Certification stamp. Is the certification stamp required?

*We require the helmet provided to meet IIIA NIJ standards.

- We not offer Small as they found their measuring system (going from Med-2x) will fit 99% of all head sizes. Can you define what your smallest head circumference would need to be?

*The vendor must be able to provide a helmet that meets the sizing requirements of all our employees. We do have employees who are very petite and would likely require a size small.

-Is there anyway to speak with the quartermaster at the PD directly?

*Contact would be Sgt. Jason Vandenberg 801-629-8602
