

**Ogden City Corporation
Request for Proposal
Ballistic Helmets**

Q & A

Updated: 2-20-24

- Are there any weight requirements for SM, MD, LG and XL size helmets? Weight dictates costs so just want to confirm.

*We would prefer the helmet be 3 pounds or less.

- Is it possible to make an amendment to the bid specification to include that all helmets must have a boltless attachment system?

Helmets with bolts are problematic as bolts tend to come off and they are also the weak point of the helmet since holes need to be drilled through the ballistic substrate.

*We are not changing the RFP.

- Will references from Fire Rescue departments be allowed?

*Yes, we would accept Fire Departments as references.
