

Dear water consumer,

NOTICE

Ogden City Water Services is required by the EPA to develop a mandatory customer service line inventory.

**The pipeline material from the meter to your property is UNKNOWN. Please help us identify your water pipeline material type.**

➤ Please fill out and return the survey below. You may also fill out this survey online (see back).

First Name: \_\_\_\_\_ Last Name: \_\_\_\_\_

Phone #: \_\_\_\_\_ Email (optional): \_\_\_\_\_ @ \_\_\_\_\_

Street Address: \_\_\_\_\_ Zip: \_\_\_\_\_ Water Acct # (if available): \_\_\_\_\_  
(ex.123 Maple)

Occupancy Type:  Owner  Renter/Tenant Year the home was built: \_\_\_\_\_  Don't Know

STEP  
1

## Locate Your Water Pipeline

*NOTE: Please do not perform this test unless you are physically capable.*

Find your water pipeline entering the home (usually in the basement on the side facing the street). Be sure to find the section from the water shut-off valve going to the outside of your property.

**For more help, please see the back of this form.**

STEP  
2

## Report the Water Pipe Material

(Please check one below. Use a penny and a fridge magnet)

Lead

A dull, silver-gray color that is easily scratched with a coin. A **MAGNET WILL NOT STICK**.

Galvanized

A dull, silver-gray color that when scratched is shiny and silver. May be rusty and a **MAGNET WILL STICK**.

Copper

The color of a penny. When it is scratched with a coin, it will expose color.

PVC

A rigid, smooth, plastic. May be colored blue.

Explain how you determined the material of your service line? \_\_\_\_\_

(or)  Still Don't Know
