Ogden City Corporation

Request for Proposal

Parking Hardware and Software System

Q & A

1. Can you please clarify who the vendor is for your PARCS equipment that will require essential integrations?
   a. T2 is our current vendor.

2. Can you also please provide details on how the city expects the integration to work for permits?
   a. Currently, Ogden City does not have a dedicated parking permit platform, and we track issued permits using Excel spreadsheets. As such, integration with existing systems will not be required for most permits. However, the permits issued to residents may need to be manually entered into the new software during the transition process.
