

Ogden City Corporation

Invitation to Bid

866 E Cahoon Circle – New Home Construction

Q & A

1. What are the soil conditions? I see from google earth that it was once older homes that were demolished and grade set back for these future homes.
 - a. There were only homes on the Quincy frontage lots. In the rear of the development was an old apartment building. You will still need to have GEOtech come out and approve excavation prior to footings installation.
2. Is there a location for the removal of extra soil, or is it a complete haul off to our site by us?
 - a. Extra dirt is staying on site for this build. Just pile and push any extra dirt onto the next lot #5.
3. Do I submit our SOQ in the bid packet, or would you like me to Email that beforehand?
 - a. Just submit SOQ with bid.
