

PRESS RELEASE**Ogden City to Celebrate Grand Opening of High-Powered DC Fast Chargers at Historic Union Station****04/17/2025**

OGDEN, UT – Ogden City, in partnership with Rocky Mountain Power and Electrify America, is excited to announce the grand opening and ribbon-cutting ceremony for eight new 350 kW DC fast chargers at Historic Union Station. This significant addition to Ogden's charging infrastructure will provide a fast, reliable, and convenient charging experience for electric vehicle (EV) drivers traveling through the region.

The ribbon-cutting ceremony will take place on **Wednesday, April 23rd, 2025, at 10:00 a.m.** at Union Station (2501 Wall Ave, Ogden, UT 84401). The public is invited to join city officials and project partners in celebrating this milestone in Ogden's efforts to enhance transportation reliability, affordability, and diversity.

"The addition of these strategically located charging stations reflects our commitment to common-sense projects that meet real needs by expanding transportation options, strengthening community partnerships, and supporting the long-term economic vitality of our downtown," said Ogden City Council Chair Marcia White.

The new DC fast chargers were paid for by Rocky Mountain Power's Electric Vehicle Infrastructure Program. The chargers will be owned by Rocky Mountain Power and operated by Electrify America, ensuring state-of-the-art technology and seamless charging experiences for EV users.

"This project represents a smart investment in Ogden's future and I'm very happy for our partnership with Rocky Mountain Power in this. These fast chargers will not only make our city more connected and accessible, but they also open the door to new opportunities for commerce, tourism, and local business," says Ogden City Mayor, Ben Nadolski. "By supporting modern infrastructure like this, we're helping to drive economic growth and position Ogden as a forward-thinking, well-connected hub in the region."

Electrify America's network of fast charging stations makes it easier than ever for drivers to take long road trips with electric vehicles. These new 350 kW chargers can go over a hundred miles of range in just minutes, making them among the fastest chargers available today.

As an added benefit, Rocky Mountain Power customers will have access to reduced charging rates, making it even more affordable to switch to electric transportation. Learn how to register at RockyMountainPower.net/Stations.
