## **EXHIBIT C WINDOW CLEANING SCOPE OF WORK**

  - 1. Surface damage is more noticeable on reflective glass as compared with the other glass products.

- B. The contractor shall not clean tinted and reflective glass surfaces in direct sunlight as the surface temperature may be excessively hot for optimum cleaning.
- C. Cleaning should begin at the top of the building and continue to the lower levels to reduce the risk of leaving residue and cleaning solutions on the glass at the lower levels.
- D. The contractor shall soak the glass surface with clean water and soap solution to loosen dirt and debris.
